## Sustainable Backyard Beekeeping Course

Catch the buzz this summertime in Flagstaff. Learn how to work with a gentle colony of honeybees in a backyard top-bar hive. Get involved in the movement to restore the health of the amazing honeybee. Practicing organic, holistic principles, we will explore the relationships between:

- \* the queen, workers, and drones.
- \* flowering plants, pollen, nectar, beeswax, and honey.
- \* eggs, larvae, pupae, and adults.
- \* humans and the rest of nature.

Each of the four classes in this course will be held on a Saturday at a private residence in southwest Flagstaff, with local field trips to Mountain Meadow Permaculture Farm and Flagstaff EcoRanch.

**Dates: June 8; July 13; August 17; and September 14**

**Cost: \$300.00**
